Allowable Subject Matter

1. Claims 1-21 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The closest art of record to the claimed invention is the publication to Hoffberg et al. (US 2002/0151992 A1). Applicant's response filed 1/8/07 provides a showing of the context by which to interpret the word "operation" in light of the specification. The Examiner is persuaded by Applicant's arguments and considers his previous interpretation of the word "operation" to be unreasonably broad. The Examiner therefore believes that the prior art fails to teach or fairly suggest specifying a signal analysis function by automatically analyzing prior operations specified by the user, wherein one or more of the prior operations is operable to generate a respective signal, thereby operating as a signal source, wherein said analyzing the prior operations determines one of the prior operations as an input signal source for the first operation, wherein the input signal source provides a first input signal to be used as the input signal for the first operation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
